Information Disclosure Statement

2. The information disclosure statement filed reference listed in the information Disclosure Submitted on 04/01/05 have been considered by the examiner (see attached PTO-1449

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. **Claims 1-20**, are rejected under 35 U.S.C. 102(e) as being anticipated by Dyer (US publication Number 2004/0198470 A1).

Regarding claims 1, 14, Dyer teaches a headset system/device, comprising:
a headset for direct wireless communication of audio data with a communication terminal and including a first power supply unit (see figure 12, numeral 1210, section 0053);
a headset carrying device (figure 12, numeral 1250, section 0052); and

a charger for charging the first power supply unit from a second power supply unit, wherein the headset carrying device comprises the charger and the second power supply unit, wherein the headset carrying device is separate from the communication terminal (figure 12, sections 0052, 0053).

Regarding claim 2, Dyer teaches a headset system as recited in claim 1, wherein the headset carrying device comprises a protective casing for the headset stowed therein (0052, 0053).

Regarding claims 3, 17, Dyer teaches a headset system as recited in claim 1, wherein the headset carrying device (1250) comprises attaching means for attaching to a user's body or clothes (figure 12, section 0052).

Regarding claim 4, Dyer teaches a headset system as recited in claim 1, wherein the headset carrying device comprises attaching means for mechanically attaching the headset carrying device to a vehicle, and for electrically attaching the charger of the headset carrying device to a power supply of the vehicle (0046).

Regarding claim 5, Dyer teaches a headset system as recited in claim 1, wherein the first power supply unit is a re-chargeable battery (see figure 9, section 0041).

Regarding claim 6, Dyer teaches a headset system as recited in claim 1, wherein the first power supply unit is a large-capacity capacitor.

Regarding claim 7, Dyer teaches a headset system as recited in claim 1, wherein the charger is a re-chargeable battery (0041, 0052, 0053).

Regarding claim 8, Dyer teaches a headset system as recited in claim 1, wherein the charger is a large-capacity capacitor.

Regarding claim 9, Dyer teaches a headset system as recited in claim 7, wherein the charger is connectable to a vehicle battery for recharging of the charger (0039, 0046).

Regarding claim 10, Dyer teaches a headset system as recited in claim 1, wherein the charger is a primary cell battery (0040-0043).

Regarding claim 11, Dyer teaches a headset system as recited in claim 1, wherein the first power supply unit is diminished to provide power for a short period of use of communicating audio data, converting between audio data and audio signals, and conveying audio signals, before re-charging is necessary (0010).

Regarding claim 12, Dyer teaches a headset system as recited in claim 11, wherein the short period is in the range of about zero to two hours (0010).

Regarding claim 13, Dyer teaches a headset system as recited in claim 11, wherein the short period is in the range of about thirty minutes to one hour (.

Regarding claim 15, Dyer teaches a headset carrying device as recited in claim 14, further comprising a protective casing for a headset stowed therein (0010).

Regarding claim 16, Dyer teaches a headset carrying device as recited in claim 14, further comprising a casing for stowing a headset, wherein the casing is transformable into a desktop mode configured to position the device on a horizontal surface (0008, 0033).

Regarding claim 18, Dyer teaches a headset carrying device as recited in claim 14, further comprising attaching means for mechanically attaching the headset carrying device to a vehicle, and for electrically attaching the charger of the headset carrying device to a power supply of said vehicle (0036, 0041-0046).

Regarding claim 19, Dyer teaches a headset carrying device as recited in claim 14, further comprising headset securing means for mechanically retaining a headset stored therein (0032, 0050).

Regarding claim 20, Dyer teaches a headset carrying device as recited in claim 19, wherein the headset securing means is configured to maintain electrical contact between co-operating contacting means for the charger and the power supply unit (0036).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Boykins et al. (US Publication 2005/0272477 A1) disclose voice dependent recognition wireless headset universal remote control with telecommunication capabilities

Cho (US Publication 2004/0242264 A1) disclose communication device and wireless headset apparatus

Michalak (US Publication 2005/0130593 A1) disclose integrated wireless headset

Shteyn et al. (US Publication 2003/0040344 A1) disclose power caching pan architecture
